Profile Summary

Software Engineer with 2+ years of experience in enterprise-scale applications and AI-driven solutions. Currently a Java Full Stack Developer with strong skills in system design and scalable development. Hands-on with LLMs, GPT API integration, NLP, embeddings, and LangChain through hackathons and personal projects. Skilled at blending AI/ML with full-stack engineering to deliver intelligent, end-to-end solutions.

Experience

Software Engineer

Societe Generale GSC

*Bangalore, KA
06/2023 – Present*

- Developed AI-ready microservices with Java, Spring Boot, and PostgreSQL, improving performance by 30%.
- Automated GDPR-compliant data workflows, integrating with ML-driven audit checks to eliminate manual effort.
- Implemented multithreaded pipelines for 8000+ daily files, reducing processing time from 12+ hours to ~30 mins.
- Enhanced CI/CD pipelines with Jenkins & Kubernetes, deploying scalable services for AI/data workloads
- Implemented scalable API solutions for handling large-volume structured/unstructured data, ensuring system resilience.

Education

College Of Engineering, Pune

B.Tech. in Computer Engineering

08/2019 – 05/2023

- **Coursework:** Data Structures and Algorithms(DSA), Computer Networks, Operating System, DBMS, OOPs, Computational Theory

Skills

AI/ML: GPT API, LangChain, OpenAI, Embeddings, Semantic Search, Prompt Engineering, RAG, NLP(basic), TensorFlow (basic), PyTorch (basic)

Programming Languages: Python, Java, TypeScript, SQL, Shell

Frameworks: Spring Boot, Spring Framework, Hibernate, JPA, RESTful APIs, Microservices Architecture, Angular (v12–v18), ReactJS, RxJS

Databases: PostgreSQL, MySQL, Oracle, NoSQL, Redis

Cloud & Infrastructure: AWS (Amazon S3), Microsoft Azure, Docker, Kubernetes (K8s)

DevOps & Automation Tools: Jenkins, Git, GitHub, Maven, CI/CD Pipelines

Projects

AI Resume Matcher — Personal Project (Ongoing)

github.com/shu3102/resume 🔗

- Developing an AI-powered resume-job matcher using OpenAI GPT APIs, LangChain, and Embeddings.
- Implements semantic similarity scoring + RAG pipelines to provide recruiters with fit scores and reasoning.
- Built as a Flask/FastAPI service, deployable on AWS for scalable usage.

HireIt — Web Development

github.com/shu3102/HireIt 🔗

- Rolled out the HireIt Full-Stack Online Job Portal, facilitating seamless interaction between students, job seekers, and companies, resulting in a 16% reduction in placement processing time and an increase in

successful job matches.

- Streamlined backend using Python Flask and created a responsive UI with HTML, CSS, and Bootstrap, improving load time by 30% and user engagement by 20%. Applied problem-solving skills to optimize performance and response time.

Hackathons & AI Initiatives

AI Hackathon – L1 Support Automation (SocGen)

- Built an AI-powered L1 Support Assistant using GPT API to automate FAQs and ticket classification.
- Applied Prompt Engineering, NLP techniques, and context injection, reducing manual L1 effort significantly.

Agentic AI Hackathon – Data Quality Automation

- Designed an Agentic AI workflow to detect, validate, and correct data quality issues across multiple sources.
- Leveraged LLM agents for anomaly detection, data validation, and automated resolution suggestions.

Awards and Recognition

- **Finalist, Algowar** – *National Level Coding Competition*
- **2× Spot Awards** – *Ownership and Delivery Excellence*
- **Top Performer Award** – *Honored for exceeding performance expectations*
