Summary

Results-driven Full Stack Web Developer with a proven track record of designing, building, and maintaining high-performance Spring Boot microservices at Société Générale. Experienced in Java, Angular, microservice architecture, and DevOps practices, with a strong focus on delivering scalable, reliable solutions that drive team and business success.

Education

Bachelor of Technology in Computer Engineering form

College of Engineering, Pune (COEP), Pune, India

August. 2019 - June 2023

Technical Skills

Programming Languages: Java 8/11/17, Python, JavaScript, TypeScript, C, C++

Frameworks & Libraries: Spring Boot, Maven, Angular 12, ReactJS, Flask, Flutter, JUnit

Databases: Oracle, PostgreSQL, SQL, MySQL, NoSQL, Redis

DevOps & Tools: Docker, Jenkins, Kubernetes, Git, Linux

Messaging & Distributed Systems: Kafka, RabbitMQ, Microservices, REST APIs

Other Skills: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Problem Solving

Experience

Societe Generale, Bangalore, Karnataka

Software Development Engineer (Java Angular Full stack developer)

June 2023 - Present

- Built and deployed a GDPR-compliant data record management system using Java 11, Spring Boot, and Angular 12 on SG's private cloud, enabling audit and purge tracking.
- Architected and delivered 7 OAuth2/JWT-secured Spring Boot microservices with robust REST APIs, JPA-based persistence, asynchronous Parquet-to-CSV exports from Amazon S3.
- Developed a responsive Angular SPA with NgRx/RxJS, achieving 30% faster load times; optimized PostgreSQL schemas for 1M+ daily transactions.
- Implemented RabbitMQ messaging and Jenkins CI/CD pipelines, boosting throughput by 40% and reducing release cycles from bi-weekly to daily with Docker/Kubernetes.
- Led high-level feature design and code quality efforts, addressing technical debt, Playwright automation, and collaborating in Agile teams to ensure best practices.

Dosii, Pune, Maharashtra

Associate Software Engineer - Internship

May 2022 - July 2022

- Enhanced the Dosii SaaS web application used by 700+ educational institutions, improving XML data processing by 12% via company pages, profile forms, and advanced dashboard filters.
- Improved search performance by 60% through implementation of caching and pagination in IaaS and PaaS environments.
- Programmed multi-threaded, high-performance backend services, ensuring 100% data integrity during platform transitions.
- Contributed to rapid release cycles by deploying backend modules, collaborating across teams, and resolving production issues swiftly.
- Gained hands-on experience with Cucumber, REST API, Test-Driven Development (TDD), MongoDB, operating systems, Gradle, Postman, and Apache on the project.

Hobbies and Interests

- Sports, Fitness, Adventure Activities, Reading and Constant Learning
